EDUCATION

B.A. in Humanities, Commerce, & Business Admin. (Major: B.I.D.T), <i>Helwan National University</i> Grade: Excellent GPA: 3.79 Ranked Top 4 among Graduation Projects	09/2022 – 06/2026
Scholarship, .NET Web Development Track, <i>Digital Egypt Pioneers Initiative</i>	04/2024 – 12/2024
Flutter Cross-Platform Development, <i>ITI</i> Mobile APP Development Track	08/2025 – 09/2025

INTERNSHIPS

IBM – AI Internship • GenAI: Developed LLM-powered chatbots and multimodal AI solutions supporting speech, text, and bilingual OCR (English/Arabic). Built AI orchestrators and MCP-based pipelines to automate agent workflows, improving operational efficiency and response accuracy. • Marketing & Strategy: Conducted market research and competitor analysis to identify business opportunities and support data-driven decision-making. Designed presentations and promotional materials to communicate AI solutions and business value to stakeholders. • Flutter Development: Developed responsive mobile UI features using Flutter and integrated backend APIs/services to deliver dynamic, scalable application functionality.	07/2025 – 09/2025
TAQA Arabia – IT Internship • Automated daily browser tasks using scripts to download and organize info • Streamlined data migration from Excel to SAP, improving accuracy	07/2023 – 09/2023

WORK EXPERIENCE

Software Programming Instructor Assistant, <i>Digital Egypt Cubs Initiative (DECI)</i> Taught software engineering, algorithms, problem-solving, and soft skills.	12/2024 – 06/2025
---	-------------------

PROJECTS

Bizify — AI-Powered Startup Development Platform  , <i>Graduation Project Helwan National University — BIDT Program</i>	2025 – 2026
• Technologies Used: React.js, FastAPI, PostgreSQL, SQLAlchemy, Redis, JWT/OAuth, SSE, PayPal API, Paymob, OpenAI SDK. • Project Description: Developing an AI-powered platform that helps entrepreneurs generate, validate, and execute startup ideas through AI-assisted market research, competitor analysis, supplier discovery, business planning, roadmap tracking, and real-time business insights.	
FenTech Intelligent Financial Management Assistant, <i>IBM AI</i>	
• Technologies Used in AI: FastAPI, AutoGen (AG2), Azure OpenAI, MCP, WebSockets • Project Description: Developed an AI assistant that helps users track expenses, manage budgets, create savings plans, and receive personalized investment guidance.	
Exo Scan AI Space Apps Challenge 2025, <i>Nasa AI</i>	
• Technologies Used: Python, Scikit-learn, Pandas, NumPy, RandomForest • Project Description: Built a RandomForest-based ML pipeline to classify exoplanet signals from NASA's Kepler dataset into confirmed planets, candidates, and false positives with optimized minority-class recall.	

CERTIFICATES

Nasa Challenges  | Computer Vision | AI Fundamentals  | ML with Python (V2)  | Generative AI and LLMs  |
MLOps Concepts | AWS AI Practitioner: expected: Aug2026

TECHNICAL SKILLS

Core CS — OOP, Data Structure
Programming Languages & Runtime — Python, C#, C++, HTML, CSS, Java, JS, Dart, Node.js
Web Frameworks and Tools — ASP.NET MVC, Express.js, Spring Boot, Figma, Flutter, Flask, FastAPI
Database Management — SQL Server, MySQL, MongoDB (NoSQL), Mongoose (ODM)
Automation Tools — Power Automate
API Development & Tools — RESTful APIs, Postman, Swagger
Testing — Jest, Unit Testing, Integration Testing, Test-Driven Development (TDD)
Deployment & DevOps — Docker, Railway
Authentication & Security — JWT, API Key Authentication, SSL/TLS, CORS
AI & ML — OpenAI Agents SDK, AutoGen, LangChain, LangGraph, MCP, AI Orchestration, LLM Applications, NLP, OCR, Hugging Face, PyTorch, Scikit-learn, CNNs, RNNs, GANs, Machine Learning, Data Pipelines

LANGUAGES

Arabic: Native | **English:** Fluent
